

# Smartflower Showcase

January 2024

## Solar is in Full Bloom at Coop Appenzell

A Smartflower can be found on the rooftop garden of the hypermarket Coop in Appenzell, Switzerland. The solar system was installed as part of a larger renovation involving a completely new facade for the building and traditional PV systems in the new rooftop garden.

The installation was completed last year by elentec GmbH, who has been a trusted installation and service partner for many years. elentec, however, has begun the new year on a high note by rejoining the Smartflower family as a new dealer! We are very grateful for elentec's continued partnership and we look forward to achieving new heights in Switzerland together.

### New Year, New Smartflower at We Grow Microgreens

A Smartflower was installed at urban farm We Grow Microgreens in Boston, Massachusetts just in time for the new year! The installation was funded by a grant from GrowBoston, the City of Boston's Office of Urban Agriculture. Watch the video timelapse [here](#).

### The First Smartflower in Finland Lands in Åland

The first Smartflower in Finland was planted at the Åland University of Applied Sciences. The installation was conducted in -22°C temperatures by dealer Solarenergy Scandinavia. The university will use the system as a learning platform for its sustainability engineering students.

### A Smartflower in Celle with OneSubsea

Dealer faboro deutschland installed a Smartflower at OneSubsea GmbH in Celle late last year. OneSubsea, a Schlumberger company, aims to achieve net-zero emissions by 2050. We at Smartflower are proud to be part of its sustainability efforts.

Have an installation, event, or trade show coming up? Have something you'd like to announce? Reach out to our Creative Designer, Sheen Hui, at [shui@smartflowersolar.com](mailto:shui@smartflowersolar.com) to be featured in next month's edition of Smartflower Showcase!
